

ARGO Vision was **founded as an innovative** startup in 2016.
It was fully **acquired by SEA Vision** in 2020.
We turned 10 years **bringing Computer Vision solutions.**

Speaker

Gabriele Lombardi

CTO of ARGO Vision

SCAN ME

What do we do?

Deep Learning Vision

R&D with *literature* scraping, internal *meetups*, algorithms experimentation
High-quality codebase to ensure robust R&D *internal tools*
Model Development for *customized solutions* for the customers
Deployment to offer our expertise in making *our models work* in the real world

Industrial Vision Development

C++ industrial-strenght solution development
Composable Vision Tools (traditional and neural) to the operator

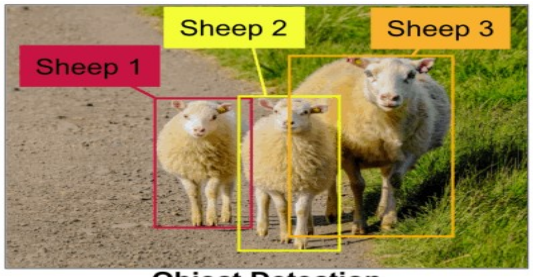
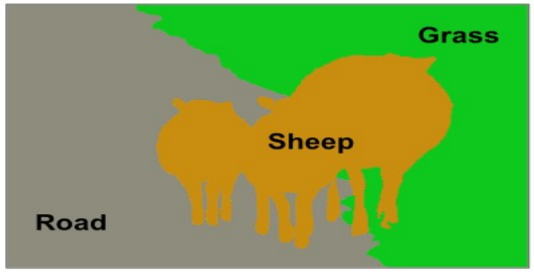
AI Vision problems we work on...

ARGO VISION

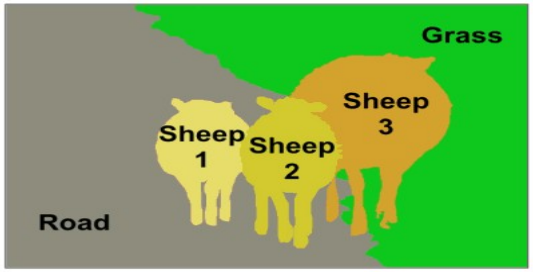
Classification + Localization



Object Detection

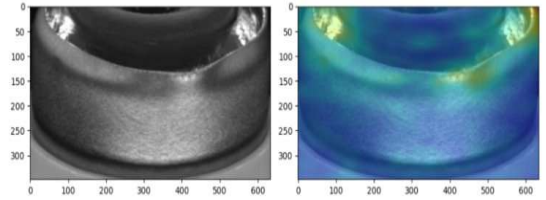


Semantic Segmentation



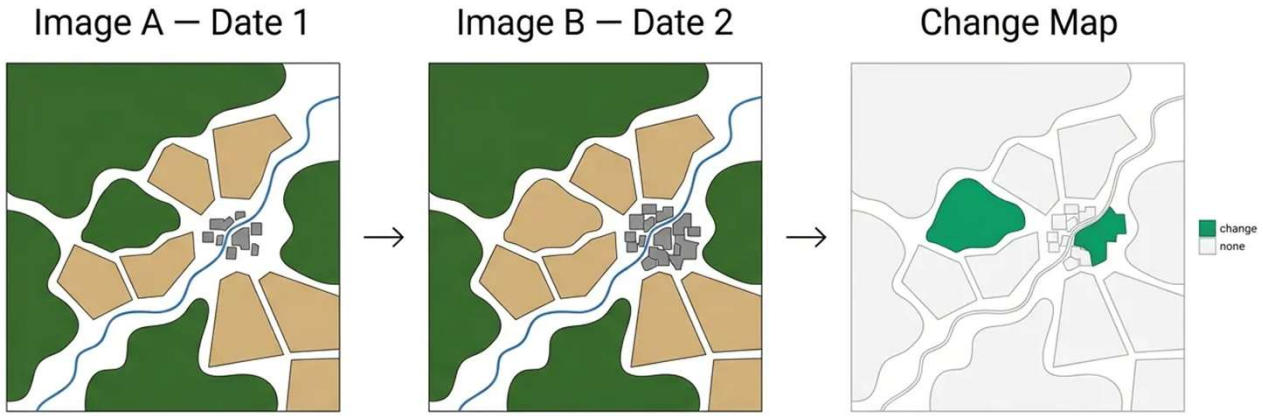
Instance Segmentation

OCR/OCV/codes



Anomaly Detection

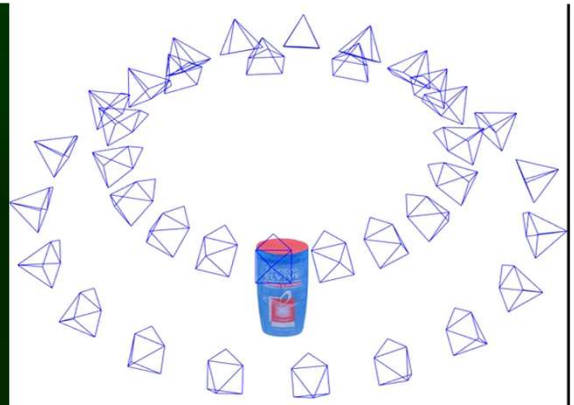
Change Detection



Use cases (traditional vision)

ARGO VISION

Industrial Anomaly



Digital twin

Remote sensing

Grocery auto-categorization

Use cases (traditional + early neural vision)

ARGO VISION

Face detection & calssification

Smart parking

Face pose & drowsiness analysis

Licence Plate Detection & OCR

Use cases (neural vision in the industrial field)

ARGO VISION

Segmentation

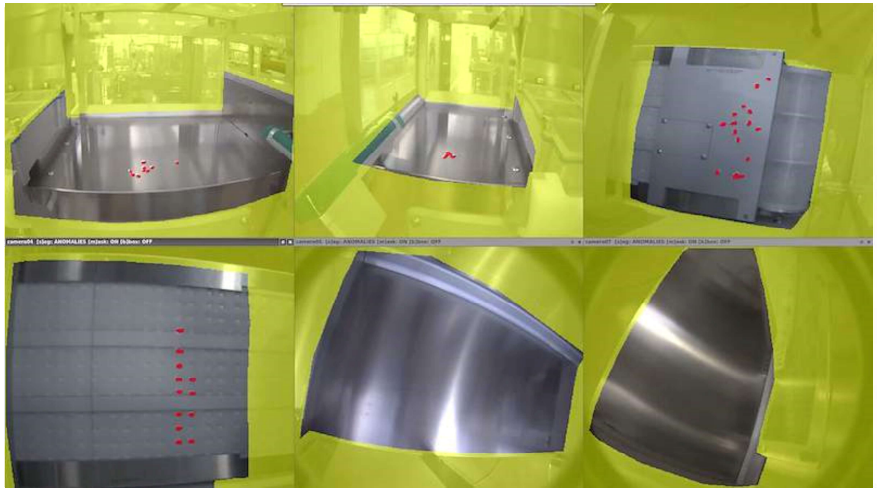
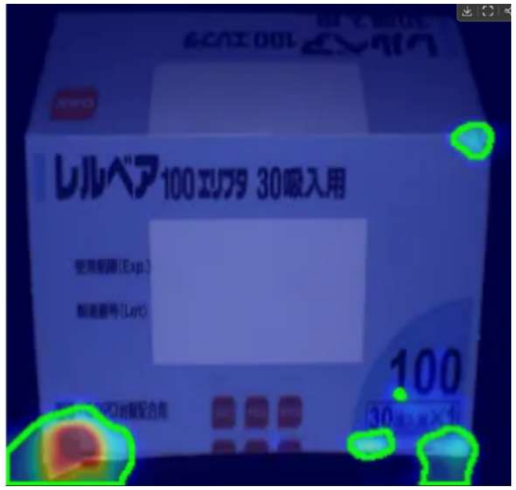
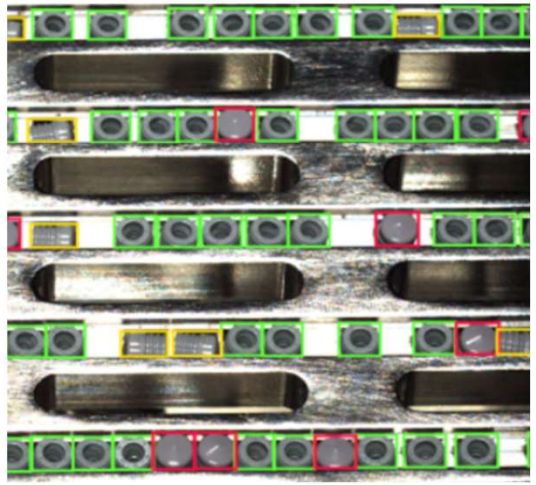
Anomaly Detection







Object Detection

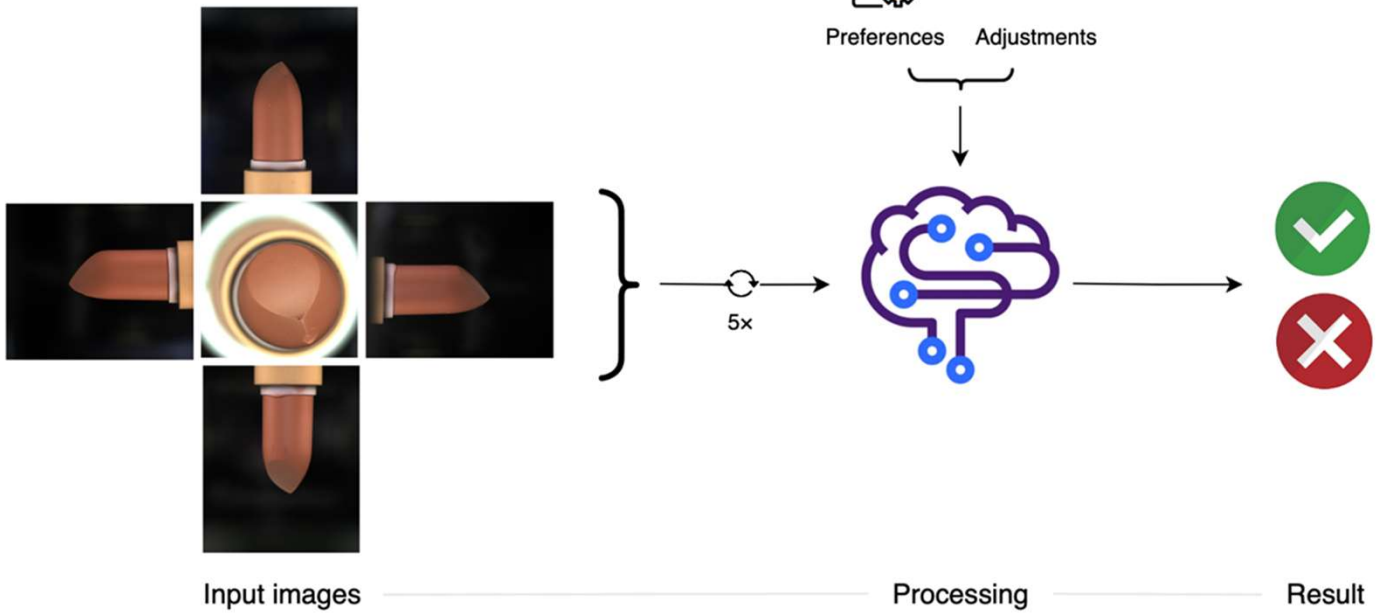
SEAVISION

AI powered by

ARGO VISION

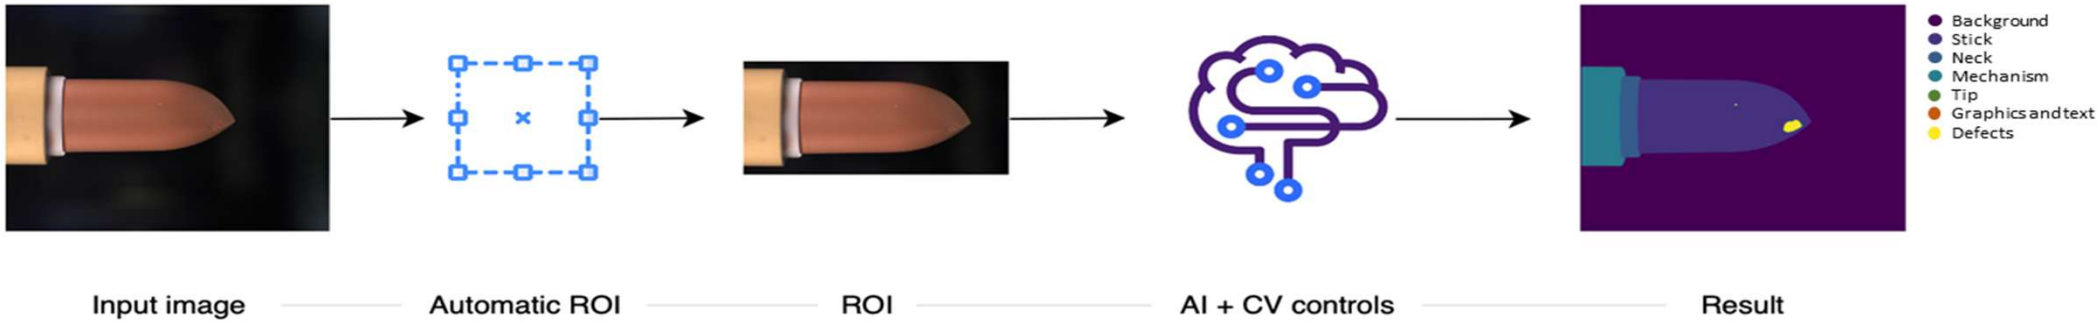
Image Analysis

The need



- Good or bad
- Analysing sides + tip
- No user training
- User adjustments..
- ..per defect class!

The process

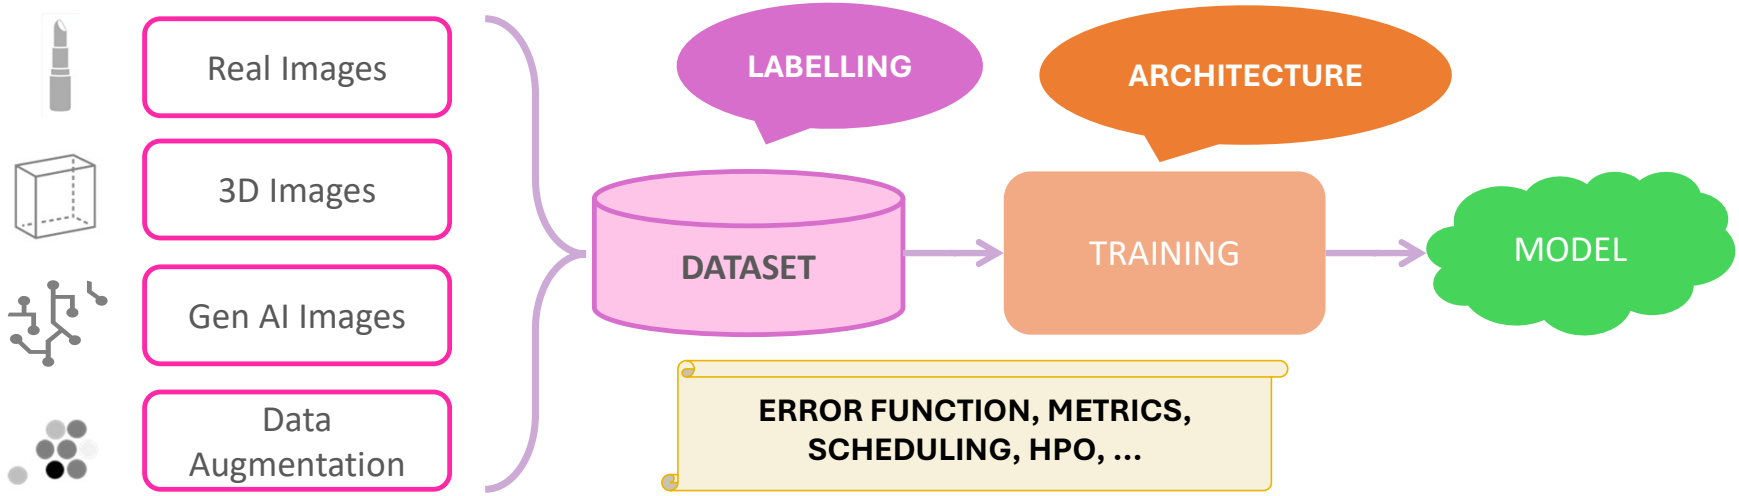


AI How It Works

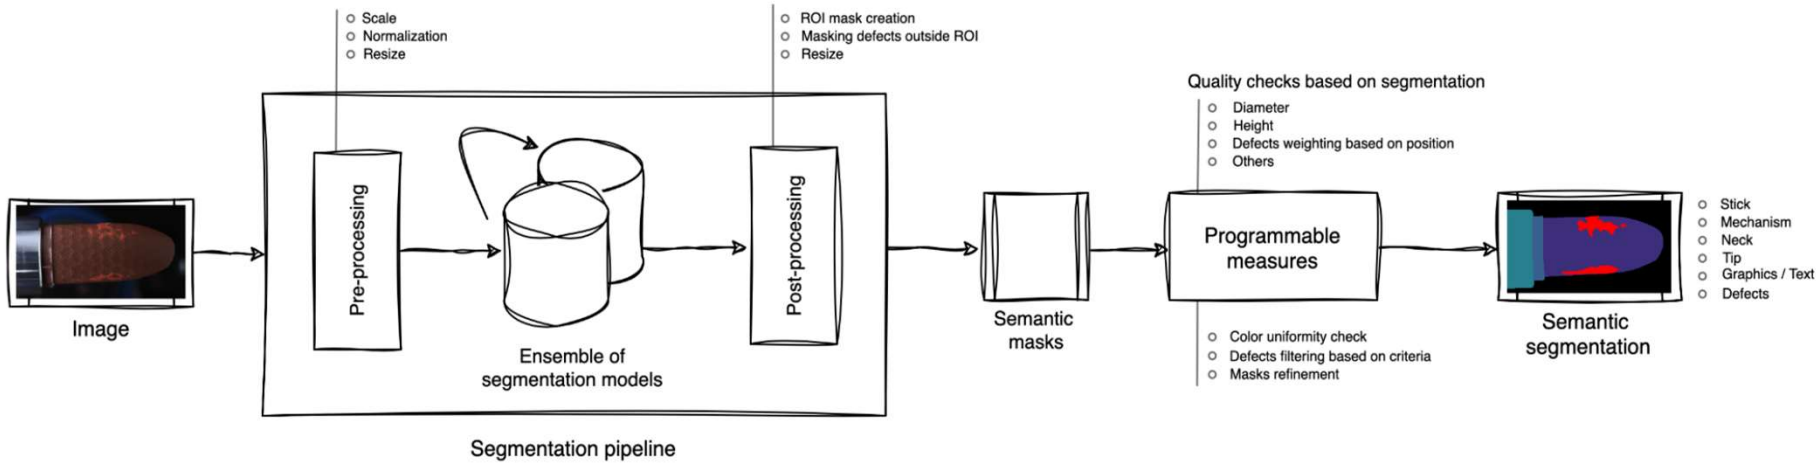
THE COMPLEXITY OF THE PROJECT REQUIRED BOTH THE USE OF AI AND THE COMBINATION OF IMAGE PROCESSING STRATEGIES

ARGO VISION

Training



Evaluation



Let’s keep in touch
